

### **Statement Regarding COVID-19 (Coronavirus Disease 2019)**

We know there are many concerns regarding the Coronavirus Disease and at Occumed Plus we want to ensure our patients and employers that Occumed Plus is closely monitoring the situation and will remain able to provide the highest level of Occupational Medicine in the industry.

Occumed Plus has developed several increased measures to ensure the safety and well-being of all of our patients, employers and employees:

1. Occumed Plus has developed a screening process to determine if any individual has the potential of being infected by the disease. Please contact us if you would like to schedule a screening for your employees. In addition, each and every patient will go through a screening process in our clinics to ensure they are not experiencing any symptoms at all. If symptoms are present, Occumed Plus has developed a protocol to limit exposure to any other patients currently in our facilities.
2. Within the next few days, through our lab partners, we will be able to test for COVID-19 on a limited basis. If an individual has been determined at risk through our screening process a sample will be collected and analyzed by the lab. We will update this information as soon as these tests are made available.
3. Our facility sanitation has been increased as an extreme measure of precaution and to ease any concerns patients and employers may have.

Occumed Plus will remain one of the only medical providers that is not open to the general public. We are here to serve the medical needs of our partner companies and their employees. We understand the level of concern surrounding COVID-19 and will remain a trusted partner in ensuring the health and well-being of the workforce in the communities we serve. We are in close contact with county health officials and are monitoring the Center for Disease Control (CDC) and World Health Organization (WHO) guidelines. We will continue to keep you updated on any changes or updates as they become available.
